

IVAN AUGUSTO XAVIER SOUZA

Senior Software Engineer

+55 (61) 99907-5949 | ivan.augustoxs@gmail.com | [LinkedIn](#) | [GitHub](#) | Brasília, Brazil

PROFESSIONAL SUMMARY

Senior Software Engineer with **17+ years of experience** in system design, distributed systems, and modernizing critical platforms for government and large enterprises. Specialist in backend (Node.js, Go), microservices, Kubernetes/OpenShift, high-availability systems, and CI/CD pipelines with integrated security. Track record in monolith migration, scalability architecture, operational resilience, and technical leadership. **Red Hat Champion** and **Certified ScrumMaster®**.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Go, PHP, Rust

Architecture & Engineering: System Design, Distributed Systems, Microservices, Event-Driven Architecture, Scalability, High Availability, Resilience

Backend & APIs: Node.js, Express, NestJS, Go, REST, gRPC, WebSockets, Clean Architecture

Quality & CI/CD: Automated Testing, Code Review, Refactoring, Code Quality, Technical Debt Management, Jenkins, GitLab CI/CD, GitHub Actions, Azure DevOps, SAST/DAST

Cloud & Platform: Kubernetes, OpenShift, Docker, Terraform, Ansible, Linux (Debian/RHEL/Fedora), ESXi

Databases & Messaging: PostgreSQL, MongoDB, Redis, Oracle, MySQL, OpenSearch, RabbitMQ

Technical Leadership: Technical Leadership, Mentorship, Architecture Standards, Stakeholder Communication, Code Review Leadership

PROFESSIONAL EXPERIENCE

Senior Software Engineer — CENTRAL IT TECNOLOGIA

Jul 2023 – Jan 2026

Called into the architecture team for re-engineering an enterprise chatbot platform, migrating from a NestJS monolith to Go microservices serving government clients.

- Led system design and migration of a NestJS monolith into **5+ Go microservices** on Kubernetes HA, delivering horizontal scalability, resilience, and independent deployments
- Built CI/CD pipeline on Jenkins with SAST, DAST, automated testing, and code review gates — replacing bi-weekly manual deploys with on-demand releases
- Developed Rust components for the NLU engine and created an embeddable web widget for legacy government portals, reducing coupling between channels and platform
- Defined architecture standards, contracts, testing strategies, code quality, and code review practices for a **10+ engineer** cross-functional team

Go · Node.js · NestJS · Rust · TypeScript · PostgreSQL · Kubernetes · Jenkins · SAST/DAST

Solutions Architect — ALLTECH SOLUÇÕES

Oct 2019 – May 2022

Red Hat Champion leading architecture and deployment of Kubernetes/OpenShift solutions for enterprise clients including Infraero (54+ airports).

- Designed and deployed OpenShift clusters up to **30 nodes** with HA control planes, Ceph storage, and Ansible-automated Day-2 operations for critical enterprise environments
- Automated infrastructure provisioning and conducted technical pre-sales, translating business requirements into architecture proposals

Kubernetes · OpenShift · Ansible · Docker · Ceph · Jenkins · GitLab CI · ESXi · vCenter

Tech Lead & Scrum Master — CENTRAL INFORMATION TECHNOLOGY

Sep 2022 – Mar 2023

- Led a 3-person engineering team building a React Native mobile app with IoT module (Serial + BLE) for beacon monitoring
- Defined architecture (React Native, AdonisJS/Node.js, MongoDB), provided technical mentorship, and established code review culture

React Native · Node.js · AdonisJS · MongoDB · BLE · Serial

Systems Analyst — INDRA SISTEMAS (CAPES / Ministry of Education)

Jan 2017 – Jun 2019

- Built REST APIs with JWT authentication in Laravel/Lumen for government education platforms (CAPES), integrating Angular frontend
- Architected **SisProuni 2.0** modernization — Brazil's national university scholarship system — focusing on refactoring, legacy evolution, and maintenance

PHP · Laravel · Angular · Oracle · Redis · Docker · Jenkins · OpenShift

Founder & Software Engineer — NAESQUINA TECNOLOGIA

Mar 2011 – Present

— Portal for local product and service search. Development of technology solutions for third parties and contracting as PJ for other companies.

ADDITIONAL EXPERIENCE

Software Engineer — MBA TECNOLOGIA (2015–2017): 6 mobile apps for MEC/INEP/Ministry of Health | SenchaTouch, Ionic (mobile)

Systems Analyst / Developer — SQUADRA (2013–2014): railway GIS system | PHP, PostGIS, ETL

Systems Analyst — UNIMIX (2008–2010): TCU/National Press web portals | PHP, Oracle

Junior/Mid Developer — TECNISYS (2007–2008): biometric authentication | Java, Oracle

OPEN SOURCE PROJECTS

- ▶ **Bluetooth Virtual Keyboard** — Turns Linux into a Bluetooth keyboard via BLE. Clean Architecture. →
- ▶ **SOLID ID** — 128-bit unique ID generator. Zero dependencies. Time-sortable. →
- ▶ **Debian 13 Hardening & Tuning** — Ansible playbook for CIS/STIG hardening. 50+ variables. →
- ▶ **k8s-one** — Single-node K8s cluster from scratch with upstream components. →

EDUCATION & LANGUAGES

Computer Science (B.S.) — Cruzeiro do Sul University (in progress — 2029)

Certified ScrumMaster (CSM) — Scrum Alliance, 2016

Java Training (100h) — Caelum: Java & OOP, Java Web with Spring, Java Testing with JUnit, JSF & Design Patterns

Portuguese: Native | **English:** Intermediate — strong technical reading comprehension, professional written communication
